

## Senior Developer / Programmer Analyst

---

Weeden Prime Services is seeking a bright and energetic Senior Developer looking to excel and make a difference in an exciting and dynamic Wall Street Prime Brokerage environment.

### Job Title

Senior Developer / Programmer Analyst

### Job Description

The Senior Prime Developer is a critical business aligned role in the Technology Development / Programming department of Weeden Prime Services. The Technology development / programming team is responsible for the development and support of the technology systems / software used for Weeden's Prime Services business. Weeden Prime Services is a technology powered prime brokerage business focused on providing institutional quality services to hedge funds and family offices. With a focus on capital raising and cutting edge technology, Weeden Prime has successfully created an ideal platform under which its clients can substantially grow their business. Weeden Prime offers a comprehensive global platform that includes proprietary risk management software, automated allocation technology, and sophisticated portfolio reporting and analytics. These tools allow clients to effectively manage their complex trade and allocation demands.

### Skills and Experience

#### Required

- 8+ years of development experience with strong background C# (ADO.Net, Dapper.Net), SQL (SQL Server, Postgresql, Oracle, or Sybase) and web technologies / frameworks including XML, JavaScript, HTML/HTML5, CSS, Node.js, React, Bootstrap
- Prime Business knowledge (with custody, clearing & settlement) a big plus
- Solid OO foundation, especially as it applies to the C# language, as well as experience with the MVC pattern.
- Proven experience with SDLC for complex projects.
- Agile development methodologies, Test driven development, Continuous integration

#### Nice to have

- FIX protocol knowledge is desired and considered a major plus
- Familiarity with C++, SignalR, GraphQL

#### Other

- Excellent Communication (written and verbal) and Organizational Skills
- Ability to interact with the business – understanding business requirements and formulating appropriate technical solutions
- Team player, possess excellent work ethics.
